

WAHTA Maple water is being exclusively launched May 1st 2014 in The Fresh Market

What is WAHTA ?

- **WAHTA** IS A 100% PURE MAPLE WATER
 - **WAHTA** is directly tapped from Canadian maple trees and freshly packed.
 - **WAHTA** is an amazing functional beverage entirely designed and created by nature that will replenish, refresh and revive your body.
- **WAHTA** is Mohawk for Sugar Maple, legend has it that after an especially long and tiring winter the earliest known inhabitants of Canada witnessed an energetic squirrel drinking a liquid from a maple tree as spring arrived. Having discovered this unique resource First Nations people consumed the water when it flowed in the spring to nourish and hydrate their bodies after the long winter.
 - **WAHTA** Maple Water is tapped directly from the majestic sugar maple trees of Quebec's Forests and can only be harvested once a year during the short spring season. Wahta is immediately packaged in a TetraPak® at the time of harvest to preserve the great taste and natural benefits to be able to enjoy it all year. To ensure the highest quality WAHTA is packed to the standards of NAPSI(Natural, Authentic, Pure, Sterile, Integral) certification. It has no added water, sugar or preservatives, the only ingredient in Wahta Maple Water is 100% pure Canadian maple sap. For more information please see www.drinkwahta.com
 - Not to be confused with Maple syrup, Maple sap is the clear water that flows naturally through a sugar maple tree to awaken it from Winter. Its appealing taste and low sugar content (5g per and 20 calories per 250ml) are naturally occurring. It also contains over 46 bioactive nutrients, including phytonutrients unique to tree waters. These nutrients, including electrolytes, vitamins, minerals and antioxidants, help boost immune health, aid in the prevention of degenerative diseases and offer great tasting hydration.
 - **WAHTA** is priced at \$1.99 for 250ml
